SUMMARY

MSc candidate in Data Science (2023-2028) at Coimbatore Institute of Technology with a CGPA of 7.52/10, and a Higher Secondary qualification (90%). Completed a web development and AI integration role at Unirols Airtex (Dec 2025 – Feb 2026), gaining 0.2 years of professional experience. Proficient in Python, Flask, HTML, CSS, SQL, PostgreSQL, MongoDB, MySQL, Neo4j, Git, and data-science tools such as deep learning, EDA, feature engineering, and Power Query.

SKILLS

python · flask · postgresql · git · sql · css · data modeling · dax · deep learning · eda · feature engineering · gnn · gst · html · method validation · mongodb · mysql · neo4j · opencv · power query · pytorch · scikit-learn · sem · tensorflow · excel · power bi

EXPERIENCE

Unirols Airtex – Web Development & AI Integration Dec 2025 - Feb 2026

- Developed a full-stack corporate website with React and Flask, organizing product data to improve navigation and customer engagement; added an AI chatbot to automate product inquiries and boost support efficiency.

PROJECTS

TRI-BIOMETRIX *Intelligent Multimodal Biometric Security System LINK* Sep 2025 - Oct 2025

- Tools & Technologies: Python, TensorFlow, OpenCV, Flask
- Implemented three-factor authentication with face, voice, and gesture recognition, using deep learning models to improve verification accuracy and reliability.
- Reduced unauthorized access attempts by ~60% using a three-layer biometric validation pipeline.

UPI ₹15+ Lakh Crore Digital Payments Velocity Dashboard LINK Jan 2026 - Feb 2026

- Tools & Technologies: Power BI, DAX, Power Query, SQL, Excel
- Analyzed RBI UPI transaction data with SQL and DAX, evaluating payment trends and state-wise growth to provide KPI-driven insights on transaction velocity and market expansion.
- Built a five-page interactive Power BI dashboard that integrated transaction, channel, and customer data to reveal behavioral patterns and performance metrics.

NETRATAX – Tax Fraud Detection using GNN LINK

- Technologies used (Nov 2025 – Dec 2025): Python, SQL, PyTorch, Flask, PostgreSQL, Neo4j.
- Engineered a fraud detection system that analyzed 500K+ GST transactions across states to identify shell entities and circular trading, structuring relational data and automating graph construction for scalable risk analysis.
- Built a fraud risk scoring model that achieved 87% accuracy with less than 5% false positives.
- Delivered four interactive dashboards for fraud network visualization and risk-based case prioritization.

EDUCATION

MSc. Data Science *Coimbatore Institute of Technology CGPA: 7.52/10 – up to 5th Sem* 2023 – 2028

Higher Secondary *Bala Bharathi Matric Higher Secondary School 90 %* 2022 – 2023

ACHIEVEMENTS

- SMART INDIA HACKATHON 2025 - Internal Hackathon winner; recognized as top 50 teams.

- TECH SCULPT PROJECT EXPO 2025, IEE STUDENT BRANCH - Winner, awarded for excellence in technological innovation.
- CIT SPARK GRANT 2025 – Finalist among 25 teams; pitched innovative project demonstrating impact and technical excellence.
- ASTRANOVA HACKATHON 2026 (Dept of IT, CIT) – 1 Runner-up, recognized for high-impact innovation.
